

IRTC

Wireless Setup Instructions

Revised 1/15/08

-In order to utilize your new IRTC fixed wireless internet service, you will need to verify that you have the following settings in place.

Minimum PC Requirements:

YOUR CONNECTION INFO:

Windows PC or Mac OS

Obtain an IP address automatically

10/100 BaseT Ethernet Card

Obtain DNS server address automatically

-You just need to verify that your computer or router is set to automatically obtain both sets of addresses it needs to connect to the Internet.

WindowsXP/2000 Setup:

(* indicates changes for Windows98 users)

-Find the icon on you desktop labeled “**My Network Places**”

-**Right click** this **icon** and **left-click** the option for **properties**.

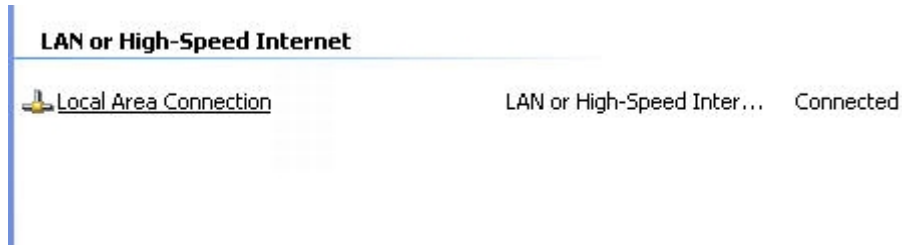

(*Windows98 Users will look for the “Network Neighborhood” icon)

-You will see various connection items on your computer in this window.

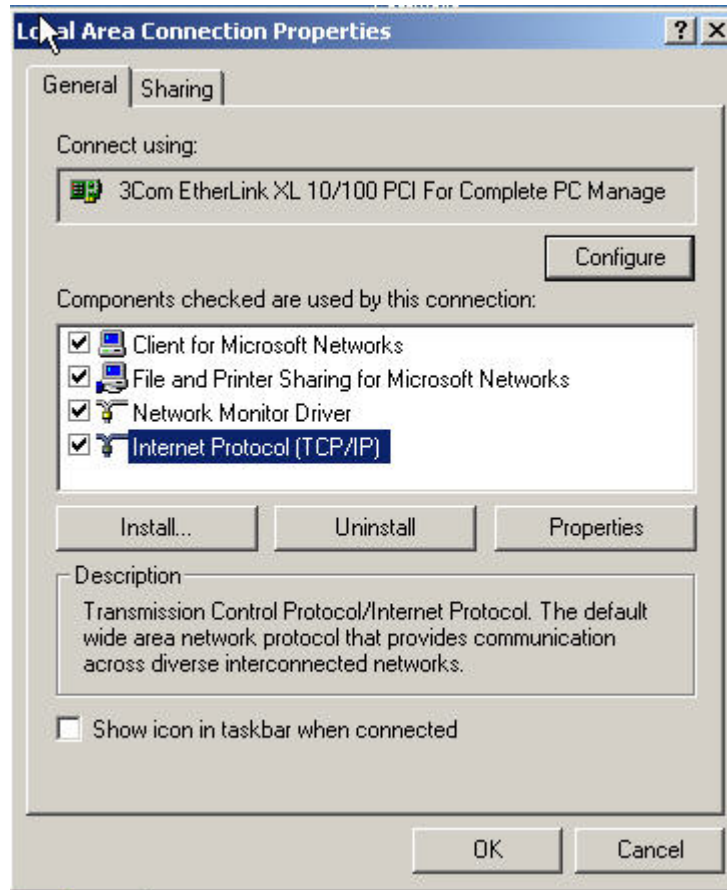

-You need to **right-click** the **connection** which is using **your current Ethernet card** where the new internet device is plugged in (usually that connection will be labeled “**Local Area Connection**” as below and **left-click** the option for **properties**.

(Note that if you have more than one network adapter, they will be numbered in the order they were installed. You must choose the one currently being used for this service).

(*Windows98 users will be looking for a configuration item with TCP/IP and their current Ethernet device to select and click properties on.)

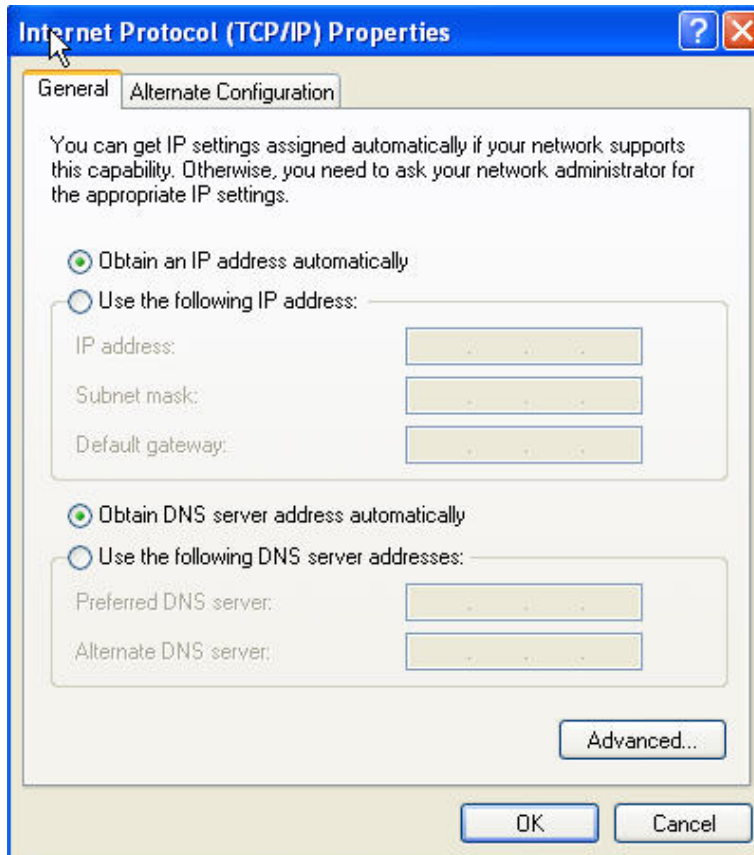

-Next **left-click** the “**Internet Protocol (TCP/IP)**” item and **left-click** the button for **properties**.

-Next **left-click** the dot for “**Obtain an IP address automatically**” and “**Obtain DNS server address automatically**” or verify that they are already selected.

(*Windows98 users will find similar selection boxes.)

-**Left-click** on the “**OK**” button and close the rest of the windows previously opened.

-You have now successfully selected your **IRTC** connection information. If you cannot connect to the Internet at this time, please verify the following...

- 1- Radio is powered up with continuous lights on the “PWR” and “Link” leds.
- 2- Cable is securely connected to Ethernet card on your computer.

-If you still are having trouble getting your connection going, please feel free to call our **Advantage Internet Helpline** at **1-877-836-6023**
